Training Guide:
How to Interpret and Administer the Parenting Map

Originally Designed by Project HOPE
OVCD Technical Support Team
Contributors

This guide was produced under Project HOPE’s Orphan and Vulnerable Children program, Sustainable Strengthening of Families of Orphans and Vulnerable Children in Mozambique and Namibia, which is supported by the U.S. Agency for International Development (USAID) under the terms of Cooperative Agreement #: GPO-A-00-05-00019-00. The contents of this publication do not necessarily reflect the views of USAID.

Learning Objectives

1) Learn what the Parenting Map is, how it works, and the purpose of each indicator
2) Learn how to administer the Parenting Map and supplemental tools
3) Gain an understanding of the different potential uses of the tool
4) Be able to train colleagues and staff on using the Parenting Map
Module 1:
Purpose of the Parenting Map
Icebreaker

Skit:

“Why doesn’t anyone have malaria?”
✓ This skit is an exaggerated demonstration of the need for tailored messaging at the household level.

✓ *Every child is different* and the education, care, and services provided should be tailored to meet the needs of each child.

✓ At the household level, this is the founding principle for the Parenting Map: to give an overall picture of each individual child in order to better address their specific needs and not deliver a ‘generic’ response and/or intervention.
The “Basics” of the Parenting Map

**Who:** Caregivers of children, ages 0-17

**What:** Tool to assess each child individually on their well-being

**When:** Collected every six months

**Where:** Collected at the household, when possible, to make observations

**Why:** To address the importance of targeted and tailored approaches for each child and family
Map Principles

Several key principles are associated with the Parenting Map, including:

– User-friendliness
– Acceptability
– Usefulness at multiple levels
– Sustainability
User-Friendliness

- **Low-literacy tool** – allows people from all educational backgrounds to administer and understand in a “fun and easy” way
- **Fits on one page** – reduces paper burden for families with multiple children
- **Simple evaluation with happy and sad faces** – provides immediate feedback on child’s status
Acceptability

- Participatory development/adaptation process – enables community buy-in and ownership, creating ‘local’ advocates

- Local artists and drawings – ensures cultural sensitivity and relevance

- Field tests and incorporation of program participant feedback – allows even the beneficiaries of the tool to be engaged from the onset

- Our experience – high acceptability by caregivers, volunteers, and field staff in our program
Usefulness at Multiple Levels

- Household level – as a parenting guide
- Community volunteer (social support level) – as a case management tool
- Program staff (NGO level) – as an identifier of gaps or breakdown in referral system
- Community or district level – as an identifier of larger societal gaps in services (access and availability); leverage tool for foreign aid in specific districts
Because of the tool’s user friendliness, acceptability, and ability to function at multiple levels, the Parenting Map is easily used after a project ends:

- Caregivers learn how to assess their child’s well-being and have markers by which to gauge progress.
- Community volunteers can continue to use the supplemental tools of the Parenting Map as a focal point to provide education, make referrals, and guide their advice to families.
- A database of child data can be aggregated at any level to leverage additional resources. Results can be tabulated by hand at the community level (computers not mandatory).
Module 2:
Design and Interpretation of Parenting Map
<table>
<thead>
<tr>
<th>Parenting Map</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Well being: had 3 meals a day</td>
</tr>
<tr>
<td>2. Disease control: 2 weeks</td>
</tr>

</tbody>
</table>
| 8. Appears to be come weight 
weight as others at their age (growth monitoring < 3) |
| 9. Drew with colors or colors other signs do |
| 10. Had white socks made |
| 11. Safe living condition (also with under) |
| 12. Sleeps in same type of bed as others |
| 13. Has 2 sets of clothes |
| 14. Has 1 kind of shoes |
| 15. Smoked in school |
| 16. Was in school every day last week |
| 17. Has school meals/wave & supply (e.g. pencil or notebooks) |
| 18. Able to read & write (age 7 years) |
| 19. Has set of exam |
| 20. Has birth certificate or applies for one |
| 21. Has school meals/wave & supply (e.g. pencil or notebooks) |
| 22. Bades as often as other children |
| 23. Has meals with other children |
| 24. Has some friends or talks to others about problems |
| 25. Has some friends or talks to others about problems |
| 26. Has no contact with other children |
| 27. Has some friends or talks to others about problems |
| 28. Has a memory book |
| 29. Attends religious services |
| 30. Has one good friend or talks to others about problems |

6 Domains of OVC Care and Support

The Parenting Map covers 6 OVC Care and Support Domains:

1) Health
2) Nutrition and Development
3) Shelter/Care
4) Education
5) Protection
6) Psycho-social Support
Measurement of Scale

- = Good
- = Not Sure/Don’t Know
- = Bad
HEALTH Domain
1. Did you take [child’s name] to the health facility the last 3 times he/she needed to go?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark 🌻 if the response was Good
- Mark 🎈 if the response was “DK/NS”
- Mark 😞 if the response was Bad
Indicator 2

**2. Has [child’s name] had diarrhea in the last 2 weeks?**

**Underlying Principle:**
Diarrhea is usually indicative of other health concerns; no child should be having diarrhea consistently.

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark 😊 if the response was **Good**
- Mark 🎉 if the response was “DK/NS”
- Mark 😞 if the response was **Bad**
Indicator 3

3. Has [child’s name] had a fever in the last 2 weeks?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark ☑ if the response was Good
- Mark ☐ if the response was “DK/NS”
- Mark ☹ if the response was Bad

Underlying Principle:
Fever is usually indicative of malaria or other illnesses; it is a warning sign.
Indicator 4

4. Is [child’s name] fully immunized (DTP1, DTP3, Measles, BCG, Vit A)?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark ☑️ if the response was Good
- Mark ☐️ if the response was “DK/NS”
- Mark ☞️ if the response was Bad

Underlying Principle:
All children need to be up-to-date on their immunizations, according to their age.
Indicator 5

Underlying Principle:
All children over 8 years old need to be exposed to HIV prevention messages

5. Has [child’s name] received HIV education (over 8 years old)?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark 😊 if the response was Good
- Mark 🎈 if the response was “DK/NS”
- Mark 😞 if the response was Bad
Indicator 6

6. Has [child’s name] received 4 meals in the last 2 days?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark ☑️ if the response was Good
- Mark ☐️ if the response was “DK/NS”
- Mark ☹️ if the response was Bad

Underlying Principle:
All children need to eat at least 4 meals every 2 days.
Indicator 7

7. Has [child’s name] eaten foods from all three food groups in the last two days?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark 😊 if the response was Good
- Mark 🎨 if the response was “DK/NS”
- Mark 😞 if the response was Bad

Underlying Principle:
All children should eat foods from all 3 food groups at each meal as much as possible.
8. Does [child’s name] appear to be same height & weight as others his/her age (or if <5 have regular growth monitoring)?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark ☑️ if the response was Good
- Mark ☞️ if the response was “DK/NS”
- Mark ☹️ if the response was Bad

Underlying Principle:
All children should appear to be similar in stature with other children his/her age.
Indicator 9

9. Does [child’s name] do what other children the same age do?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark 😊 if the response was Good
- Mark ☹️ if the response was “DK/NS”
- Mark 😞 if the response was Bad

Underlying Principle:
All children should be socially and physically active to some degree.
10. Does [child’s name] drink clean water?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark 😊 if the response was Good
- Mark ☹️ if the response was “DK/NS”
- Mark 😞 if the response was Bad

**Underlying Principle:**
All children need to be drinking from clean water sources.
SHELTER/CARE Domain
Indicator 11

11. Does [child’s name] have safe living conditions (strong walls and roof)?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark 😊 if the response was Good
- Mark ☹️ if the response was “DK/NS”
- Mark 😞 if the response was Bad

Underlying Principle:
All children need to be living/sleeping in a safe house, out of the elements.
Indicator 12

12. Does [child’s name] sleep under a mosquito net?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark ☑ if the response was Good
- Mark ☐ if the response was “DK/NS”
- Mark ☞ if the response was Bad

**Underlying Principle:**
All children (and adults) in malaria-endemic areas need to sleep under a mosquito net to prevent malaria.
13. Does [child’s name] sleep in the same type bed as the other children?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

Underlying Principle:
All children should be treated equally – one indicator is the type of bed each child sleeps in.

- Mark 😊 if the response was Good
- Mark ☹️ if the response was “DK/NS”
- Mark 😞 if the response was Bad
Indicator 14

Underlying Principle:
Each child needs to have at least 2 sets of clothing for hygienic purposes (a basic need).

14. Does [child’s name] have 2 sets of clothes?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark ☑️ if the response was Good
- Mark ☟️ if the response was “DK/NS”
- Mark ☟️ if the response was Bad
Indicator 15

Underlying Principle: Each child needs to have at least one pair of shoes (a basic need).

15. Does [child’s name] have one pair of shoes?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark 😊 if the response was Good
- Mark ☹️ if the response was “DK/NS”
- Mark 😞 if the response was Bad
EDUCATION

Domain
Indicator 16

**Underlying Principle:**
All school-aged children should be enrolled in school.

16. Is [child’s name] enrolled in school?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark 😊 if the response was Good
- Mark ☹️ if the response was “DK/NS”
- Mark 😞 if the response was Bad
Indicator 17

Underlying Principle:
All school-aged children should be attending school every day consistently.

17. Was [child’s name] in school every day last week?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark 😊 if the response was Good
- Mark 🤔 if the response was “DK/NS”
- Mark 😞 if the response was Bad
Indicator 18

Underlying Principle: All school-aged children need to have the basic but necessary school materials for enrollment and good performance.

18. Does [child’s name] have school uniform/waiver and supplies (i.e. pencil or notebook)?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark 😊 if the response was Good
- Mark 🤔 if the response was “DK/NS”
- Mark 😞 if the response was Bad
Indicator 19

Underlying Principle: Having the ability to read and write are skills that best prepare our children for successfully supporting themselves.

19. Is [child’s name] able to read and write (if over 7 years)?

Possible responses:
- Yes
- No
- I don’t know (DK)/I’m not sure (NS)

- Mark ☑ if the response was Good
- Mark ☒ if the response was “DK/NS”
- Mark ☐ if the response was Bad
Indicator 20

Underlying Principle: Children should perform well in school.

20. Does [child’s name] do well on exams?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark ☑️ if the response was Good
- Mark ☐️ if the response was “DK/NS”
- Mark ☒️ if the response was Bad
PROTECTION

Domain
Indicator 21

**Underlying Principle:**
All children need to have proper identification in order to access services and education.

21. Does [child’s name] have a birth certificate or has applied for one?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark 😊 if the response was Good
- Mark ☹️ if the response was “DK/NS”
- Mark 😞 if the response was Bad
Indicator 22

22. Does [child’s name]’s caregiver have a succession plan (will or death certificate)?

Possible responses:
- Yes, No, I don’t know (DK)/I’m not sure (NS)
  - Mark 😊 if the response was Good
  - Mark 🥲 if the response was “DK/NS”
  - Mark 😞 if the response was Bad

Underlying Principle:
All children need a plan that establishes what happens if a caregiver passes away.
Indicator 23

Underlying Principle: All children should be treated equally in the household.

23. Is [child’s name] treated the same as other children in the household?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark 😊 if the response was Good
- Mark ❓ if the response was “DK/NS”
- Mark 😞 if the response was Bad
Indicator 24

Underlying Principle: No child should be consistently showing signs of unexplained bruises or injuries.

24. Does [child’s name] have unexplained bruises or injuries?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark ☺️ if the response was Good
- Mark ☹️ if the response was “DK/NS”
- Mark 😞 if the response was Bad
Indicator 25

Underlying Principle: Each child in the household should be treated equally, in relation to quantity of and age-appropriate work.

25. Does [child’s name] do the same work in the house as other children?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark 🌟 if the response was Good
- Mark ⚫️ if the response was “DK/NS”
- Mark 🙁 if the response was Bad
PSYCHO-SOCIAL SUPPORT
Domain
Indicator 26

Underlying Principle: Children should have an general overall happy disposition and be optimistic about life.

26. Does [child’s name] cry without an explanation?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark 😊 if the response was Good
- Mark ☹️ if the response was “DK/NS”
- Mark 😞 if the response was Bad
Indicator 27

Underlying Principle: Children should obey and respect their caregiver, just as the caregiver should listen and respect each child.

27. Does [child’s name] obey adults similar to other children (not defy or rebel)?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark 😊 if the response was Good
- Mark 🧐 if the response was “DK/NS”
- Mark 😞 if the response was Bad
Indicator 28

**Underlying Principle:**
All children should have some form of a memory or picture book.

28. Does [child’s name] have a memory book?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark 😊 if the response was Good
- Mark 😐 if the response was “DK/NS”
- Mark 😞 if the response was Bad
29. Does [child’s name] attend religious services?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark 😊 if the response was Good
- Mark 🎉 if the response was “DK/NS”
- Mark 😞 if the response was Bad

Underlying Principle:
Some source of spiritual guidance and external support is shown to be healthy for the child.
Underlying Principle:
Every child should have at least one person to confide in and trust to talk about both joys and problems.

30. Does [child’s name] have one good friend or talks to you about problems?

Possible responses:
Yes, No, I don’t know (DK)/I’m not sure (NS)

- Mark 😊 if the response was Good
- Mark 🤔 if the response was “DK/NS”
- Mark 😞 if the response was Bad
Module 3:
Score Card and Practice
# Score Card for Parenting Map

<table>
<thead>
<tr>
<th>Date:</th>
<th>(First, Middle, Last)</th>

<td></td>
</tr>
</tbody>
</table>
The Score Card is for data collection use, not for the caregiver. It is used by the same person who administers the Parenting Map.

The Score Card is the piece that returns to the office for aggregating and evaluating data beyond the household level.

It was originally created in order to capture multiple children on one sheet, lessening the paperwork burden for data collectors.
How to Mark on the Score Card

=  Good  =  3

=  Not Sure/Don’t Know  =  2

=  Bad  =  1

Not Applicable (N/A)  =  4
Role play:

– 3 Volunteers:
  • 1 Facilitator (Narrator)
  • 1 Caregiver
  • 1 Volunteer/Staff Member
Practice Exercise Instructions

Volunteer/staff:

• Leads the caregiver through the Parenting Map asking questions about his/her children

Caregiver:

• Answers questions about his/her children

YOU (act as the Volunteer):

• Record “scores” on the Score Card, as if you were the Volunteer
Practice Exercise “B”

Role play:

- 3 Volunteers:
  - 1 Facilitator (Narrator)
  - 1 Caregiver
  - 1 Volunteer/Staff Member

- Same directions as before
Module 4: Action Plan and Practice
<table>

</tr>
</tbody>
</table>
Purpose of the Action Plan

✓ The caregiver fills out the Action Plan for all the children he/she is caring for.
✓ The Action Plan can be left with the Caregiver to act as “plan” for where each child needs to improve.
✓ The Action Plan can also act as a “follow-up guide” for the Community Volunteer at their next household visit.
✓ Having the caregiver fill out the Action Plan keeps them engaged and mindful of each child’s status.
How to “Mark” on the Action Plan

• Mark √ if the Caregiver replies with a positive or good response (corresponds to “3” on the Score Card)

• Mark X if the Caregiver replies with a negative or bad response (corresponds to both “2” and “1” on the Score Card)

• Mark --- if the question is not applicable to that child (corresponds to “4” on the Score Card)
Practice Exercise “C”

Role play:

- 3 Volunteers:
  - 1 Facilitator (Narrator)
  - 1 Caregiver
  - 1 Volunteer/Staff Member
Practice Exercise Instructions

Volunteer/staff:
• Leads the caregiver through the Parenting Map asking questions about his/her children

Caregiver:
• Answers questions about his/her children

YOU (act as the Caregiver):
• Mark on Action Plan with “X” or “✓” or “---” as if you were the Caregiver
Module 5:
Leveraging Action
Using Data to Leverage Action

With aggregated data by region, province, district, community, village, etc., the ability to leverage action is in YOUR hands!
Sample Analysis

Achievement of Indicators – Health Domain

- Health facility last 3 times needed: 44% (Orphans), 51% (Vulnerable)
- No diarrhea in last 2 weeks: 75% (Orphans), 70% (Vulnerable)
- No fever in last 2 weeks: 69% (Orphans), 64% (Vulnerable)
- Fully immunized: 71% (Orphans), 71% (Vulnerable)
- Received HIV education (over 8): 75% (Orphans), 68% (Vulnerable)
Community Action

Break into groups:

- Looking at the sample analysis, answer the following questions:
  1) What do you conclude from the analysis?
  2) How would you propose to act on this information/data?
  3) What groups (people, organizations, government bodies, etc.) would you take this to in your own community to leverage action?
Adapting to Needs

Large Group Discussion:

- What other programs could this tool be adapted for?
- How can you use the tool in your project, organization, or work?
Module 6: Wrap-up and Feedback
Wrap-up and Feedback

• Were your expectations met?

• Did you achieve the learning objectives?

• Do you have any comments or feedback?
Thank you for your time. We hope you have enjoyed learning through this training guide. If you have any questions, comments, or suggestions, please feel free to email acooper@projecthope.org or sdalebout@projecthope.org for immediate assistance/feedback.
